Abstract not available for CN1227457

Abstract of corresponding document: EP0924927

A program information storing section (2) stores program information including program name, program start time, and channel discriminating information. A program information search section (4) searches the program information stored in the program information storing section (2) according to designated search conditions and produces personalized program information resulting from the search. A program guide display section (6) displays a program guide including a personal channel consisting of the resultant program information. Thus, the receiving apparatus (100) allows users to display their personal channels.
